TRITON PCS
QUARTERLY E911 IMPLEMENTATION REPORT
May 2, 2005

Triton PCS License Company L.L.C., d/b/a SunCom Wireless, and Triton License Newco L.L.C. (collectively, "Triton"), by their attorneys, hereby submit this quarterly enhanced 911 ("E911") report to the Federal Communications Commission ("Commission") pursuant to the Commission's decision to afford Tier II carriers additional time to meet their Phase II E911 obligations.¹ In this report, as required by the *Order to Stay*, Triton updates the status of its E911 Phase I and Phase II deployment progress.²

I. STATUS OF PENDING E911 PHASE I AND PHASE II REQUESTS.

Triton currently operates a wireless network that covers approximately 13.6 million people in Virginia, North and South Carolina, northeastern Tennessee and northern Georgia.

¹ Revisions to the Commission's Rules to Ensure Compatibility with Enhanced 911 Emergency Calling Systems, Phase II Compliance Deadline for Non-Nationwide CMRS Carriers, Order to Stay, 17 FCC Rcd 14841 (2002) at ¶¶ 28-31 (hereinafter "Order to Stay"). Tier II carriers are defined as non-nationwide carriers that had over 500,000 subscribers as of year-end 2001.

² As required in the Order to Stay, Triton is providing this quarterly report to the Executive Directors of APCO, NENA and NASNA and their counsel.

This service area covers six major trading areas (“MTAs”) and thirty-six basic trading areas (“BTAs”), primarily in rural and secondary markets.

On December 1, 2004, pursuant to the closing of the first stage of an Exchange Agreement entered into on September 21, 2004 (the “Exchange Agreement”) with AT&T Wireless Services, Inc. (“AT&T Wireless”) and Cingular Wireless, LLC (“Cingular Wireless”), Triton transferred PCS network assets held for use in its Virginia markets to AT&T Wireless and Cingular Wireless in exchange for PCS network assets held by AT&T Wireless for use in certain of its North Carolina markets and in Puerto Rico and the U.S. Virgin Islands and the payment by Cingular Wireless to Triton of \$175 million. In addition, the parties entered into leases under which each party has the right to access the PCS spectrum under certain FCC licenses associated with the transferred network assets, pending the transfer of those FCC licenses at a second closing. Triton currently is in the process of integrating the newly acquired markets and converting the divested markets. Once the transition is complete, Triton will operate a wireless network covering approximately 18.3 million people in 31 BTAs. Triton previously reported that it expected its February 1st, 2005 filing could be the last filing reporting on the divested Virginia properties and that this report could be the first for the newly acquired PSAPs. The transfer of licenses associated with the Exchange Agreement has not yet occurred. For this reason, Triton’s current filing encompasses the same markets as previous reports. Cingular has, however, apparently contacted the PSAPs in those markets for which they will obtain former Triton licenses, and has communicated its intent to change the E911 Phase II network solution in place to one of its own design. Triton continues to work with Cingular to assist during this transition and continues to maintain the currently deployed architecture.

Triton continues to make significant progress in its efforts to deploy Phase I location capability services. To date, Triton has received 201 requests for Phase I service. Of those

requests, 184 are in service and 17 are pending. For these 17 outstanding requests, the following summary outlines their status:

Current Status	Count
PSAP and Triton mutually agree that the PSAP is not ready for various reasons, including LEC, CPE, selective router and database issues or a PSAP is simply not ready to integrate at this time or PSAP has withdrawn its request	10
Ready to deploy, mutually agreed-upon schedule in place	6
Less than six months old – in planning stages	1
Total	17

For specific details regarding outstanding requests, including details applicable to each request that has been pending for more than six months, please refer to the Appendix to this report.³

Triton also is making significant progress towards fulfilling requests for Phase II service. To date, Triton has received 145 Phase II requests. For all of the requests that came due during the preceding quarter, either Phase II service has been deployed, a mutually agreed-upon schedule for deployment has been arranged between Triton and the PSAP entity, or Cingular has obtained or is in the process of obtaining a new schedule for deployment for the licenses that it will acquire pursuant to the Exchange Agreement.⁴ Accordingly, Triton has met its deployment benchmark for the period preceding this Quarterly Report to the extent indicated by the information above and in the Appendix.

³ On February 14, 2005, Triton received an “Import Exceptions” report (the “Exceptions Report”) from the FCC regarding the appendix filed with Triton’s last quarterly report. The Exceptions Report noted an error in the data provided for the Darlington County, SC PSAP. On February 17, 2005, Triton requested that the FCC correct its database to reflect a PSAP request date of 7/24/2004, a projected deployment date of 2/25/2005, and a comment of “Implementation testing completed – minor issues remaining – working with PSAP and vendor to resolve.” Upon subsequent further investigation, Triton discovered that the PSAP request was actually dated 7/22/2004. The current Appendix correctly reflects this date.

⁴ See Revision of the Commission’s Rules to Ensure Compatibility with Enhanced 911 Emergency Calling Systems, Petition of City of Richardson, Texas, Order on Reconsideration, 17 FCC Rcd 24282 (2002) at ¶ 2 (“Finally, we clarify that nothing in our rules precludes wireless carriers and PSAPs from mutually agreeing to an implementation schedule different from that prescribed by our rules.”).

The attached Appendix includes information on all pending requests for Phase I and Phase II service received from individual PSAPs in the format required by the Commission.⁵ This Appendix lists the name of the PSAP, the date the request was received, whether or not the request is valid, and the status of the request.⁶ To the extent any request has been pending for more than six months, the appendices list specific reasons for the delay, steps taken to resolve the problem, and anticipated date of full completion of the necessary work.⁷

II. GSM OVERLAY NETWORK

As outlined in its previous quarterly reports, Triton intends to utilize the network-based TDOA/AOA location solution for its GSM network. Triton is approaching the final phase of integration testing with its network-based location vendor, Andrew, formerly Grayson Wireless, and the implementation of GSM capability within their TDOA/AOA network-based location equipment. Triton previously outlined an expected integration completion date consistent with the end of the first calendar quarter for 2005. Due to interoperability issues after several months of diligent troubleshooting, Triton has not been able to complete the integration. As a result, Triton has coordinated new deployment dates with the individual PSAP entities and these new dates are reflected in the attached Appendix.

As previously reported, Triton continues to work with Polaris Wireless to extend the capabilities of the Polaris location system to the GSM air interface. Triton previously outlined an expected testing and verification completion date of March 31st, 2005. Due to interoperability issues after several months of troubleshooting, Triton has not been able to complete the
